

Amazon Vendor Central Guidelines

Complete PO Processing & Shipping Standards

LEDsone • DCVoltage • SRM Supplies • Homin GmbH

PO Processing Workflow

- 1 PO Receive & Download - Inventory Team**
When weekly PO request arrives from Amazon, login to portal and download all orders
- 2 Stock Availability Check - Inventory Team**
Verify stock availability for all received orders - system inventory check
- 3 Product Boxes Availability Checking - Inventory Team**
Verify packaging boxes availability for confirmed products - ensure sufficient stock of appropriate size boxes for all SKUs in the order
- 4 Quantity Confirmation - Inventory Team**
If stock available, confirm exact quantity in vendor portal (partial/full)
- 5 Warehouse Allocation - Inventory Team**
Unit 4 vs Unit 3 - decide based on which warehouse has higher stock availability
- 6 Picking List Generation - Inventory Team**
Provide confirmed orders to picking team - decide boxes or pallet shipping method
- 7 Small Boxes Order - Postage Team (Lakshika)**
Each units boxes - order small boxes required for individual units
- 8 Master Boxes Order - Postage Team (Lakshika)**
Overall box - order master/outer boxes for the complete shipment
- 9 Pallet or Box Send Decide - Packing Team (Sevanthi Akka)**
Decide whether the shipment goes out as pallet or as individual boxes
- 10 ASN Creation (AFTER Packing) - Postage Team (Matheesan)**
Create and submit ASN in portal - print labels after packing
- 11 Packing & Labeling - Postage Team (Matheesan)**
Follow guidelines for packing - stick all required labels
- 12 Documentation & Dispatch - Postage Team (Matheesan)**
Sign CMR, prepare all documents and handover to driver
